

How American Student Assistance and Worktour get thousands of students to voluntarily spend their extra hours learning about careers and preparing for success in the workforce

WORKTOUR CUSTOMER CASE STUDY: Founded in 1956, American Student Assistance

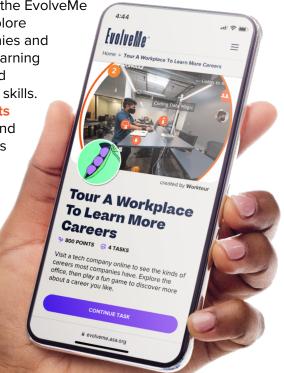

is a national nonprofit organization changing the way kids learn about careers and prepare for their futures through equitable access to career readiness information and experiences. Their EvolveMe plaform launched in 2023 and has grown quickly to **over one million students**, using more than 100 career readiness tasks powered by edtech innovators.

The tremendous scale of EvolveMe's user base requires ASA to connect with quality career education resources that are accessible and reliable. Worktour was chosen to conveniently offer immersive and interactive experiences of real workplaces online or on mobile whenever and wherever a student might want access, without requiring any VR

equipment. Students selecting a Worktour task option on the EvolveMe platform complete a fun, in-system activity where they explore through Worktour's 360-virtual workplaces of real companies and employee job shadows, and dive into interactive career learning resources like games, puzzles, illustrated infographics, and information on jobs, courses, CTE pathways, and required skills.

The activity introduces new in-demand jobs that students may not know exist, and tailors important career details and workforce concepts to be effectively understood in Grades 5-14.

Given that selecting and completing tasks on the EvolveMe platform is self-driven by students, completion rates were expected to be considerably lower than the typical 90%+ completion rates for Worktour activities that are usually structured and supervised within school and class settings. Remarkably, initial results showed a completion rate of 65% from thousands

of voluntary students across the U.S. Although the activity requires only 30 minutes, most students went above and beyond the assigned steps to explore additional workplaces on their own.

Students' feedback overwhelmingly showed they realized the immediate value of this unique learning experience:

"I truly believe that I learned more about careers with these activities. I thought I knew all about them but it turns out I didn't."

"I was unsure how to learn about jobs [before].
Now, I feel that I have a better understanding of how to explore the jobs I'm interested in, and am more prepared for my career search."

"I feel like I_
have a greater
understanding of
how the workforce
functions and
this helped me
realize that
there are more
opportunities in a
single workplace."

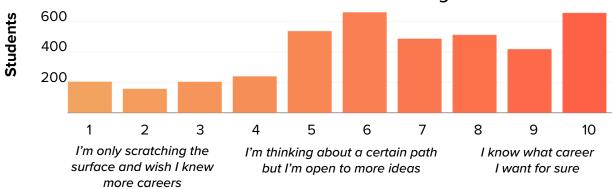

Jean Eddy, ASA CEO and President, said: "This is unmistakable proof that students are self-motivated to learn if the experience is fun and the benefit is clear. We are delighted by the success from working with innovative, mission-aligned partners like Worktour who are keeping young people engaged with their future planning."

Worktour's sophisticated in-system activity platform and integrated analytics tools go even deeper to share insights that help educators better guide students to successful future careers. ASA's students have been introduced to over 20,000 in-demand careers so far through Worktour, and have reported on key data such as how confident they feel about their career-readiness, their plans after high school, and their most important considerations when selecting a career. After completing the activity, 32% of students reported they now realize they didn't know as much as they thought they did about careers.

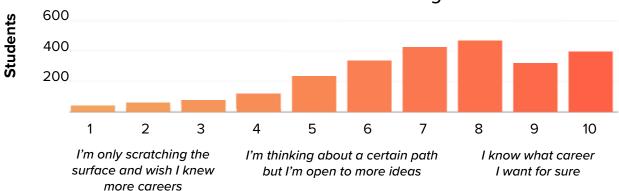

"Before I felt like I didn't know much, but now that I've seen actual people working and how they do their job I feel more confident."

"At first I thought I knew what a career would entail, but <u>now I'm</u> rethinking what that could mean for me."

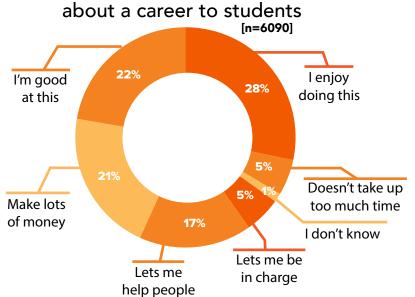

Level of career readiness before starting Worktour

Level of career readiness after starting Worktour

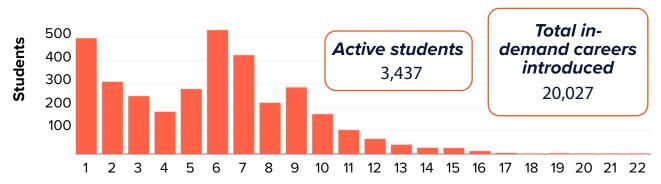

Most important factors about a career to students

"I now feel that
I am ready to
take on my
work experience
because I feel as
if I am capable of
getting started."

Franny Lee, Worktour CEO, said: "Helping students through the EvolveMe platform is a privilege for Worktour, especially after hearing concerns from many teachers in rural, urban, private, and public schools that they need effective, convenient ways to provide students with more opportunities to discover careers. We built Worktour to be fun and keep students engaged in discovering new paths to fulfilling futures, and also to easily integrate into and enhance work-based learning and CTE programs with our full catalog of pre-made activities on critical career topics as well as intuitive analytics tools."

Number of careers introduced through Worktour

"Before, I was stuck in between, however, now I feel more prepared for my future and what career I want to go for."
