

Experience the Future of Education in Virtual Reality

Inspirit VR Devices Arrive Classroom Ready

Rest easy with the iKeepSafe certified Inspirit solution, safeguarding student data privacy with compliance to FERPA and COPPA standards. Students do not need a Facebook login to use Inspirit's VR headset.

Hardware Specifications

- Fast-Switch LCD Display
- 1832 x 1920 Resolution Per Eye
- 3D positional audio
- Glasses Compatible
- 128 GB

Mobile Device Management

At Inspirit, we utilize a Mobile Device Management (MDM) system which provides a variety of benefits. An MDM allows for a safer educational environment by restricting internet access and granting you greater control over the VR experience guaranteeing that learning is both secure and focused in Kiosk Mode.

Network Support

Inspirit will collaborate with you to ensure that your network is optimized for Meta Quest 2 headsets.

Six Degrees of Freedom (DOF)

Stanford research confirms it—realistic experiences and freedom to interact within the virtual environment significantly boost learning outcomes. Inspirit's solution aligns with this research, making it the top choice for immersive learning.
